Annex 1 - Waste transfer receipt		
Annex 2 - Report on non-compliance of ship-generated waste reception facilities		
Annex 3 - Map of berths in the Port of Ventspils		

Introduction

The management of ship-generated waste in the port is carried out in accordance with the "Ship Waste Management Plan in the Port of Ventspils". The plan is published on the Freeport of Ventspils website - www.portofventspils.lv

The Freeport of Ventspils operates an internationally defined "indirect charging" system. This means that ships pay the sanitation fee regardless of whether or not waste and polluted waters are transferred. The sanitation fee covers all types of waste generated by the ship, including passively fished waste, but excludes cargo-generated waste, which is transferred to the berth operator according to set service tariffs, and excludes MARPOL Annex II and Annex VI waste, transfer of which is organised through the shipping agencies and paid for by the customer (ship).

In order to ensure a good condition of the marine environment, ships are obliged to sort waste according to the MARPOL convention categories and to deliver it to the port waste reception facilities in a sorted form. The Baltic Sea has a particularly sensitive ecosystem, which means that there are prohibitions on discharging waste into the sea, especially this applies to ship cargo-generated waste classified under MARPOL Annex V, where it is possible to deposit such waste in port waste reception facilities as a paid service.

1. Procedures for the reception and management of ship-generated waste and cargo residues

Efficient waste reception and management is ensured by a coordinated action of all the companies and ship crews involved.

1.1. Information on waste reception options in the port and their licensed waste managers

Type of waste	Company	Address, telephone number	Berth No.	Working hours	Type of fee
MARPOL Annex I - Oil					
Oily bilge water	Freeport of Ventspils Authority	19 Jāņa Street, Ventspils, LV-3601, +371 63622586	1-29, 37, 50-53	24/7	Sanitation fee
	JSC (AS) Ventbunkers	90 Dzintaru Street, Ventspils, LV-3601 +371 63602501	30-33	24/7	Sanitation fee
Oily residues (sludge)	Freeport of Ventspils Authority	19 Jāņa Street, Ventspils, LV-3601 +371 63622586	1-29, 37, 50-53	24/7	Sanitation fee
Oily tank washing (slops)	JSC (AS) Ventbunkers	90 Dzintaru Street, Ventspils, LV-3601 +371 63602501	30-33	24/7	For the volume transferred according to tariff
Dirty ballast water	JSC (AS) Ventbunkers	90 Dzintaru Street, Ventspils,	30-33	24/7	For the volume transferred

		LV-3601 +371 63602501			according to tariff
Scale and sludge from tank cleaning	JSC (AS) Ventbunkers	90 Dzintaru Street, Ventspils, LV-3601 +371 63602501	30-33	24/7	For the volume transferred according to tariff
Other (specify)	Freeport of Ventspils Authority	19 Jāņa Street, Ventspils, LV-3601 +371 63622586	1-29, 37, 50-53	24/7	Sanitation charge, excluding cargo-generated waste

Exhaust gas cleaning residues					

Layout of berths in the port, as shown on the map of berths in the port of Ventspils (Annex 3)

1.2. Waste transfer arrangements

Before the ship enters the port, the ship's agent or, if there is none, the shipping company or the master of the ship shall make a notification of the ship's waste transfer electronically in the SKLOIS system. According to the notifications submitted to SKLOIS, the ship's agent shall organise the collection of the waste in accordance with the planned transfer quantities indicated.

The ship's agent shall inform the waste management companies of the need to accept waste from the ship, either by sending information electronically or by telephone. The application shall specify the name of the vessel, the berth at which the vessel will be located, the date of performance and the agreed time of service, the quantity and type of waste, the name of the agent company and a contact telephone number.

In the Freeport of Ventspils, ships are prohibited from discharging any waste into the aquatorium or burning it on board.

The waste transfer note (Annex 1) shall be filled in by the waste management company operator when accepting ship-generated waste.

2. Procedures for reporting non-compliance of waste reception facilities

If the master of the ship finds non-compliance of the reception facilities in the port of Ventspils, he shall fill in the report form on non-compliance of the reception facilities for ship-generated waste (Annex 2) and submit it to the competent authority of the flag state of his ship or to the Fisheries Control Department of the State Environmental Service and to the Freeport of Ventspils Authority.

If the State Environmental Service receives a report from the competent authority of a ship of another flag State or from the master of a ship about non-compliance of port waste reception facilities in the port of Ventspils, it shall carry out an investigation into the non-compliance of the reception facilities and inform the competent authority of the flag State of the results of the investigation.

If the master of a Latvian flagged ship finds non-compliance of port reception facilities of a foreign country, he shall fill in a report form on non-compliance of port reception facilities (Annex 2) and submit it to the state limited liability company "Latvian Maritime Administration" (hereinafter referred to as - Latvian Maritime Administration). The Latvian Maritime Administration shall immediately notify the competent authority of the port State and the International Maritime

Organisation of any non-compliance with the port reception facilities using the forms and procedures specified in the International Maritime Organisation Guidelines for Providers and Users of Port Reception Facilities.

3. Procedures for payment for the reception of ship-generated waste

There are two categories of ships in the Port of Ventspils: ships that do not pay an indirect waste acceptance charge and ships that pay an indirect waste acceptance charge:

- The indirect charge for waste reception does not apply to public service vessels, harbour fleets, small vessels other than fishing vessels and recreational boats, and barges without crew. These vessels pay a direct fee for the reception of all types of waste, depending on the volume of waste transferred;
- Other vessels (including yachts and fishing vessels) pay an indirect charge - a sanitation fee for reception of sewage, wastewater, municipal waste and passively fished waste. The sanitation fee is calculated per port visit according to the gross tonnage of the vessel and the time spent in port (days). Vessels in this category pay a direct fee for receiving polluted ballast water and cargo tank washings. The reception of waste from recreational boats is provided by the marina operator, and recreational boats pay an indirect waste reception fee based on the number of days spent in the marina.

The Freeport of Ventspils Authority receives income from indirect fees - sanitation fees, and this income covers 95% of the Freeport Authority's direct waste reception costs. Direct waste acceptance costs are:

- Direct costs of the Freeport of Ventspils Authority for the reception of polluted waters by specialised vessels owned by the Freeport of Ventspils Authority;
- The Freeport of Ventspils Authority's direct costs for transferring polluted water and solid waste to waste reception facilities of other service providers.

The sanitation fee and service fee threshold levels are set out in the "The Freeport of Ventspils Fees", which are prepared by the Freeport of Ventspils Authority and approved by the Board of the Freeport of Ventspils. The approved Freeport of Ventspils fees, as well as amendments to the Freeport of Ventspils fees are published in the official gazette "Latvijas Vēstnesis" and on the Freeport of Ventspils Authority website www.portofventspils.lv.

KUĢU ATKRITUMU NODOŠANAS KVĪTS Nr. ___
